Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 4, the word "means" is preceded by the word(s) "ladder" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer #3,961,681 in view of Scheiding #4,055,139. Fischer discloses a mobile scissor lift assembly 10 comprised of platform 14, base 11, wheels 12, rear wheel motors 50, 51, scissor lift assembly 15-17, scissor assembly power supply 85, control panel 41, and power supply compartments 43. Fischer fails to disclose an explosion proof supply compartment with ventilation means.

Art Unit: 3634

Scheiding, as recited in column 3, lines 25-44, teaches the utility of an explosion proof power supply housing that can be vented to the atmosphere. An arrangement such as this reduces risk of explosion from external air sources. Therefore, to one of ordinary skill in the art, it would have been obvious to provide the lift assembly of Fischer with an explosion proof power supply housing as taught by Scheiding, so as to reduce risk of explosion from external air sources.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer in view of Scheiding, as applied to claims 1, 2, and 5, above, and further in view of Harbison #6,761,248. Harbison, as recited in column 4, lines 10-15, teaches the utility of a ladder that can be attached to a lift platform 14 of scissor lift assembly 20, this providing access to the platform from lower elevations. Therefore, to one of ordinary skill in the art, it would have been obvious to provide the lift assembly of Fischer with a ladder as taught by Harbison, so as to provide access to the platform from lower elevations.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the primary reason for the allowable subject matter of claim 3 is the inclusion of 1st and 2nd control means, the 1st located on the platform and controlling the scissor drive means, and the 2nd located on the base controlling the vehicle drive means as recited on page 5, lines 1-4 of the specification. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.
